

Downloading and Unzipping The Eliora Concordance

Each version of The Eliora Concordance is available for download as a .zip format file
Follow the instructions on the Eliora Welcome Page to download your chosen Version.

Note!

If you are using Firefox or any other browser released by the same developers please be aware that the download policies may consider .zip files to be uncommon for downloading with a web browser.

This is a valid security precaution; however, there is an error message generated by this activity which **MUST** be given a response in order for the download to be completed. If you do not respond correctly the downloaded .zip file will remain empty.

The most simple way to overcome this problem is to use the standard web browser that came with your computer.

Instructions for unzipping Version 1 of Eliora Topical Concordance with Windows

After you have downloaded the .zip file, you will need to close your **web browser** (eg. Edge, Chrome, Firefox etc). You will then need to open your download folder in your **file browser**.

Once this is complete, look for the file called Version1.zip

Right click once on your mouse. A box/window will open on your screen.

You will see the words "Extract all". Click on this.

A new window opens with the file path "C:\Users\your User Name\Downloads\Version1".

Place your mouse on the file name and Backspace to delete the word "Version1".

At the bottom of the window you will see the word "Extract". Click on this word and your device will unpack the files.

Instructions for unzipping Version 2 of Eliora Topical Concordance with Windows

After you have downloaded the .zip file, you will need to close your **web browser** (eg. Edge, Chrome, Firefox etc). You will then need to open your download folder in your **file browser**.

Once this is complete, look for the file called Version2.zip

Right click once on your mouse. A box/window will open on your screen.

You will see the words "Extract all". Click on this.

A new window opens with the file path "C:\Users\your User Name\Downloads\Version2".

Place your mouse on the file name and Backspace to delete the word "Version2".

At the bottom of the window you will see the word "Extract". Click on this word and your device will unpack the files.

Instructions for unzipping version 3 of Eliora Topical Concordance with Windows

After you have downloaded the .zip file, you will need to close your **web browser** (eg. Edge, Chrome, Firefox etc). You will then need to open your download folder in your **file browser**.

Once this is complete, look for the file called Version3.zip

Right click once on your mouse. A box/window will open on your screen.

You will see the words "Extract all". Click on this.

A new window opens with the file path "C:\Users\your User Name\Downloads\Version3".

Place your mouse on the file name and Backspace to delete the word "Version3".

At the bottom of the window you will see the word "Extract". Click on this word and your device will unpack the files.
